MB-K1000

 Nakamichi®

POWER. ENDURANCE.

Features

Programmable First Track

Hit songs are what sell the CDs.

You can program which track plays first for each disc in the changer. It's a great way to tie-in with special promotions and advertising campaigns.

Informative Play Counter

Make smarter buying decisions.

A 4-digit counter keeps track of the number of times each disc has been selected.

It gives you additional information that can help with inventory control. And the information is retained for up to a month without external power.

Versatile Modular Design

Install the system as you see fit.

The MB-K1000 system features separate controller (operating panel) and player units.

The players can be mounted vertically or horizontally.

This compact, versatile design makes the entire system highly customisable and space-efficient.

Remote Installation Capability

Simplify disc management.

Using optional extension cables, player units can be installed at a distance from their controllers.

Placing the players in a central location makes it easier to update the selection mix and manage your listening stations.

Flexible System Configuration

5-disc version – the MB-K1000f – is also available.

You may start with a 5-disc listening station and upgrade to a 10-disc system simply by adding a MB-5 changer unit.

10-Disc, No Waiting

Maximise your sales potential.

With a 10-disc capacity, the MB-K1000 enables customers to sample across a broad spectrum of your store's offerings.

Rock-Solid Reliability

Count on fast, dependable changer performance.

The ultra-reliable high-speed mechanism is based on Nakamichi's world-renowned MusicBank® technology.

It provides numerous benefits, including fast changes without annoying delays.

Other Advanced Features

- Wide volume adjustment range accommodates any ambient noise level.
- LED indicators instantly show you which changer slots are occupied and which are empty.
- Auto power conserves energy and extends pickup life by turning the unit off after 5 minutes of inactivity.

Specifications

Power Requirement	10V / 1.5A (Via Supplied AC Adapter)
Power Consumption	15W
Dimensions / Approx. Weight	
CD Changer	149(W) x 43(H) x 262(D) mm / 1.8 kg
